

FLEET MANAGEMENT

Fleet Management is a function which allows companies which rely on transportation in business to remove or minimize the risks associated with vehicle investment, improving efficiency, productivity and reducing their overall transportation and staff costs, providing 100% compliance with government legislation (duty of care) and many more.

Powerful features

Real Time Location: Identify and track the location of objects or vehicles in real time

Geo Fence: Draw any shape on the map and receive real time alerts if the vehicle enters or exits specific areas

Ignition On / Off: receive instant alerts for unauthorized use, ignition ON outside of working hours and then provide the authorities with the real-time location of the stolen asset.

Acceleration and harsh braking: Receive Real Time speeding, harsh braking or other alerts, via email or SMS text.

Engine Diagnostics: gather data which can be utilized in the repair of the vehicle, and it can also be used during things like emissions testing, in which a truck is checked to confirm that it adheres to emissions standards for vehicles in its class.

Trip History and reports: Allows you to track all Trip History with our GPS device installed

BENEFITS

- Reduced Operating Costs
- Increased Efficiency
- Enhanced Service and Satisfaction
- Greater accuracy
- Assurance Over Legal and Ethical Requirements

WE CAN TRACK ANYTHING

Customized in line with the client's specific future requirements
