

# LIVE GPS TRACKING SYSTEM

Nova GPS Tracking System allows to monitor the location of any type of vehicles with real time alerts and other customized features.

Our software collects and organizes driving data so you can monitor the driver's behavior, vehicle maintenance and safety at anytime from any PC or smartphone.

## Real Time Tracking

Automatically identify and track the location of objects or vehicle in real time. It can also provide the authorities with the real-time location in case of stolen asset.

## Real Time Alerts

Unauthorized use, speeding, harsh breaking or acceleration

## Geo Fence

Draw any shape on the map and receive notifications if the vehicle enters or leaves specific locations.

## Reports

Monitor the vehicle mileage, fuel usage details, speeding summary and allows you to see all trip history.

## Easy Installation

Requires no technical expertise: just choose the vehicle, plug and track your vehicle in seconds.

- Real Times Monitoring
- Stolen Vehicle Recovery
- Customized features
- Access 24/7 from anywhere

## BENEFITS

- Cloud based to provide real time access from anywhere.
- User-friendly software for all levels of technical expertise.
- Plug and play easy installation
- Real time tracking and alerts
