

# SENSOR ASSURE: REMOTE MONITORING

Our easy-to-use wireless monitoring solution uses a cellular gateway to gather sensor data. With real time alerts, you will always be aware of what happening even if you can't be there in person.

## FEATURES

- Secure and easy-to-install.
- Event notifications and alerts.
- Reports. e.g. maintenance management, working hours, etc.
- Full visibility 24/7. Real-time and historical location monitoring
- Remote monitoring from anywhere (PC, tablet or smartphone)

**Now you can address  
problems before they grow  
into expensive repairs.**
